

Lay Pack

The Lay Pack stores an attack line, adapters and reducers. It deploys hose 'on-the-fly' or as the fire fighter covers the distance – ideal for laying hose in a restricted space or simply stretching hose between the water supply and the **Attack Pack**.

Features:

- Lays the hose straight from the pack – avoids tangles and kinks
- Light weight and offers both shoulder strap and hand carry handles
- Secures all components however is effortlessly deployed
- Coloured to indicate its role in the hose lay system
- Easily packed
- Hose spanner stowage space
- Variable back strap placement for maximum Fire Fighter comfort
- Protects hose from damp and rain
- Provides 10cm of height adjustment – allows for canvas as well as rubber hose

The Hose Lay Solution

Common to every incident is the need to *stretch* hose between the water supply and an area near the ideal entry point of the fire and then the need to charge a hose into a *coil* allowing it to easily advance into the hostile environment.

The QuickLay Packs have been specifically designed to provide a solution to the standard hose lay requirement.
